|---|---|---|
| | When this screen popped up. The user did not understand that she was being rewarded. She did not understand that she should want to collect stars and was not excited about the reward. Severity: 3 |  <br>we created a printed screen that will pop up after the users first star to explain the rewards system |
|  | The user hit the back button before submitting her recording. Severity: 2 | We made the submit button darker and made a pop up window if the user hits back before submitting an interpretation<br>  |
|  | Our user successfully navigated back to this screen after listening to emotional interpretations and listened to controversial interpretations. | |
|  | Our user offered a vulgar interpretation (featuring swear words) in response to a controversial interpretation. | We will add a ai “moderator” feature to our watch that will listen to interpretations and delete them if they feature vulgar content. We also will offer real-time auditory warnings if their interpretation has is inappropriate after an initial auditory scan by our ai moderator. |
